

13.3 Environmental education measures

13.3.1 Indicator:

Local education programmes on climate

Universitas Sriwijaya offers environmental education programs at both the master's level (<https://pps.unsri.ac.id/program-studi-pengelolaan-lingkungan/>) and the doctoral level (<https://pps.unsri.ac.id/ilmu-lingkungan/>). The curriculum encompasses issues related to climate change, with a specific focus on climate change research topics examined in the form of theses and dissertations. Additionally, both programs regularly campaign on climate change risks, impacts, mitigation, adaptation, impact reduction, and early warning systems through webinars, seminars, and collaborations with third parties.

Within these programs, students delve into specialized climate change research topics, exploring innovative solutions to address the challenges posed by global warming. These research inquiries culminate in the form of comprehensive theses and dissertations, where students contribute valuable insights to the ongoing discourse on climate change mitigation and adaptation strategies.

Additionally, Universitas Sriwijaya collaborates with various third-party organizations to enhance its impact. These partnerships enable the university to expand its reach and actively contribute to the development and implementation of early warning systems, essential for effectively managing and minimizing the impact of climate-related disasters.

Through these educational programs, research endeavors, and collaborative initiatives, Universitas Sriwijaya plays a pivotal role in shaping a sustainable future, fostering a new generation of environmental leaders equipped to tackle the complex challenges of climate change.
