

Promoting Sustainable Land Use through Tree Planting at Firdaus Park, Sriwijaya University

Sriwijaya University (Unsri) has taken notable steps towards sustainable land use, exemplified by the mass tree-planting activities at Firdaus Park. This initiative, part of Unsri's annual celebration, showcases the university's commitment to environmentally responsible practices. The event, held at Firdaus Park, marked a pivotal moment in Unsri's calendar, with the active participation of the university's leadership. During this event, the importance of launching the academic year with tree-planting activities was highlighted, emphasizing Unsri's dedication to responsible land use. Each faculty received designated land for the cultivation of fruit trees, promoting biodiversity on campus.

Unsri aims to have this reforestation program considered for inclusion in the GreenMetric University Ranking, an international platform for promoting sustainability among universities. This underlines Unsri's commitment to setting a benchmark for environmental responsibility.

Firdaus Park's creation was lauded as a visionary concept, showcasing the beauty and diversity of Indonesian landscapes. It emphasizes the role of educational institutions in environmental conservation and sustainable land use. The tree-planting event at Unsri underscores the university's dedication to fostering an eco-friendly environment, inviting the cultivation of plants on campus. Students from various faculties participated alongside university leaders, symbolizing a shared commitment to sustainable land use.

In summary, the tree-planting activities at Firdaus Park, Sriwijaya University, symbolize Unsri's commitment to sustainable land use. These initiatives set an example for responsible land management and encourage ecological conservation within the academic community and beyond.
