

SDG 15 – Sustainable use, conservation and restoration of land (policy)

Implementasi Sustainable Development Goals 15 Life On Land Oleh Pemerintah Provinsi Sumatera Selatan

Indonesia's policy on sustainable use, conservation, and restoration of land reflects the country's commitment to balancing economic development with environmental preservation. Through this policy, Indonesia aims to ensure that its natural landscapes are utilized in a manner that allows for long-term sustainability while also safeguarding critical ecosystems and biodiversity. The policy encourages responsible land management practices, such as reforestation and the protection of endangered habitats, to restore and maintain the health of its lands for future generations.

IMPLEMENTASI *SUSTAINABLE DEVELOPMENT GOALS 15 LIFE ON LAND*
OLEH PEMERINTAH PROVINSI SUMATERA SELATAN

UNIVERSITAS SRIWIJAYA

2022

Sriwijaya University uses policies set by the South Sumatra provincial government no. 3 of 2020 concerning the Regional Action Plan for the Sustainable Development Goals of South Sumatra Province for 2019-2023.

Based on this policy, Sriwijaya University guarantees conservation, restoration and sustainable use of ecosystems, especially since this university is the largest university in Southeast Asia and is surrounded by many forests. Sriwijaya University often carries out ecosystem protection and development activities, such as planting trees on land and many more.
