

17.3 Publication of SDG reports

17.3.12 Publication of SDG reports - SDG 12: Responsible Consumption and Production

Universitas Sriwijaya has demonstrated a commitment to environmental sustainability by effectively converting organic waste into valuable fertilizer. This innovative approach not only addresses the issue of waste management but also promotes eco-friendly practices within the university community. By recycling organic waste materials, such as food scraps and agricultural residues, into fertilizer, the university contributes to reducing the environmental impact of waste disposal, conserving resources, and nurturing a more sustainable ecosystem.

The transformation of organic waste into fertilizer is a notable example of Universitas Sriwijaya's dedication to practicing responsible and environmentally conscious solutions. This initiative not only showcases the university's efforts to reduce its carbon footprint but also educates students and the broader community about the importance of recycling and sustainable practices. By doing so, the university plays a pivotal role in promoting a culture of environmental stewardship and contributing to a greener, more eco-conscious future.
