

### 17.3 Publication of SDG reports

#### 17.3.14 Publication of SDG reports - SDG 14: Life Below Water

Universitas Sriwijaya has undertaken an effort to preserve and conserve the aquatic environment within its campus. This commitment to environmental conservation signifies the university's dedication to fostering a sustainable and harmonious ecosystem. By proactively safeguarding aquatic habitats, such as ponds, lakes, and rivers on its premises, the university not only contributes to the local biodiversity but also provides students with unique learning opportunities to understand and appreciate the delicate balance of aquatic ecosystems.

The conservation of the aquatic environment at Universitas Sriwijaya also serves as an inspiring example of how educational institutions can play a crucial role in environmental stewardship. The university's initiatives in this regard demonstrate a commitment to protecting natural resources, promoting ecological awareness, and creating a conducive atmosphere for research and learning related to aquatic life and ecosystems. By preserving these environments, Universitas Sriwijaya reinforces the importance of conserving natural habitats and nurturing a sense of responsibility for the environment among its students and the broader community.
